

# The Freebies Guide

This is a guide which will enable you to get freebies such as:

£50 Topup Voucher  
iPhone 4  
iPad  
Amazon Vouchers

In fact you can get any item by getting free Amazon vouchers. You can even use this system to just get cash.

This system works by joining a referral network where you can get gifts for referring people. In order to get gifts you need to complete an offer and refer a certain amount of people.

The company I use is [Freebie Jeebies](#) but I use the mobile version. They are based in the UK but they allow anyone in the world to use their services. I have found them

to be great as they allow you to change your gifts and get anything. I started off using this system to get a free £50 voucher. Once I had my voucher I started getting more referrals in which I swapped for a HDTV. I know am getting regular referrals and I just swap it for cash.

In order for you to get a £50 topup voucher you need to get 3 referrals and complete an offer. You can think of getting 1 referral as £20.

Step 1. Sign Up To [Freebie Jeebies](#)

Step 2. Complete an Offer

Step 3. Promote Your Referral URL

These steps are really simple to follow. Once you have signed up you can complete a free offer. Getting referrals maybe tough for some people but i will show you some great ways in which I promote them.

### **Promotional Methods**

Niche Research - The way I promote this is to find a product that people want but there is not that much competition. I use the google keyword tool to find keywords that people search for in search engines.

I then rank high in google by building a website around these terms. You can use [blogger.com](#) to create your own website.

Once I have my website I review the product with unique content. I then have my referral ID on this website.

I then use different methods to link back to my website. I use facebook, twitter, youtube and article directories.

These links pointing back to my website allow my website to rank higher in google.

I don't pick keywords such as iphone 4 or ipad 2. I know that there is too much competition for a free iphone 4. One example is free electric shaver or free braun shaver.

Youtube Marketing - One tip is to create a video response on a highly popular video. Another way is to keep adding friends and then you can message them with your video.

Facebook Marketing - This is probably my favourite method. I create a lot of fan pages to promote my referral url. In fact I have around 30 fan pages all to do with different topics. Some of them are freebies, some are free movie sites. I then gather a lot of fans by adding friends and then suggesting them to my fan pages. One method to get facebook fans is to use a gig on [fiverr.com](https://www.fiverr.com) When you have a certain number of friends you can send them your referral link.

Twitter - I use a auto follow tool that allows me to follow twitter users with certain keywords. I then add them as friends and build a list of followers. I can then tweet my referral link or direct message them.
